

# Growing Together towards Smart Maori Aquaculture

## Ngā Iwi i Te Rohe o Te Waiariki

Global wildstock fisheries are in decline while demand for protein is growing. It is prudent for Ngā Iwi i Te Rohe o Te Waiariki and indeed all Māori to critically investigate alternative ways to supply kaimoana for whānau and for valuable world food markets. We are exploring sustainable, resilient aquaculture opportunities - how we can do this together, care for our moana and importantly, grow our whānau!

### PROGRAMME

10am Welcome and morning tea

#### Korero 1 - Hear the Findings of Stage 1: Opportunities Assessment for Iwi Aquaculture in Te Moana-a-Toi
